

IN THE SPECIFICATION

Please amend the Title on page 1 as follows:

IMAGING DEVICE HAVING AN IMAGING ELEMENT MOUNTED ON A
SUBSTRATE.

Please replace the paragraph beginning at page 42, line 6, with the following rewritten paragraph:

FIG. 55 shows an example of practical use of a portable terminal shown in FIG. 53B. In FIG. 55, the angle of inclination of the imaging device ~~25~~ 26 is designed such that the user's eyes 27 are aligned with the position of the display section 24 at a predetermined distance. In this way, if the lead frames 22 are formed so as to realize the state shown in FIG. 55, a discrepancy between the position of the user's eyes 27 and the position of the display section 24 can be mitigated. In this case, the user can easily recognize his own image in the center of the screen of the display section 24.
